

March 6, 2019

Dear Anjan Kumar Das:

Welcome!

Congratulations! This letter certifies that TIBCO Streaming Analytics has found that you successfully completed all the requirements to be a Certified StreamBase Developer ("CSD"), a program of knowledge assessments offered by TIBCO Software, Inc.

You passed both the Online Exam and the Programming Assignment and are now part of the StreamBase certified developer community. We wish you great success working with the StreamBase product and working with us here in the Streaming Analytics products group of TIBCO Software, as well as with our partners and our customers.

Keeping Your Status Up To Date

Your CSD status is effective as of the date of this letter and is valid for **at least** two years. When and if we decide to require renewal, we may offer a new assessment to you to renew your status. The idea of the renewal is to make sure that all certified developers are up to date on the latest StreamBase features and practices. The renewal process will not require retesting features you already know – it will be just enough to make sure you stay current with the product as it gets better and better with each release. If we don't attempt to contact you about renewal, your CSD status will still be in effect.

The Future

We look forward to keeping in touch with you as you work on StreamBase projects. We also want to hear your ideas about the product as you gain more experience with it. As always, if you have any questions about the Certified StreamBase Developer Program, you can direct them to us here at ep-certification@tibco.com.

Once again, congratulations!

Best wishes,

A handwritten signature in black ink, appearing to read "Steve Barber", written in a cursive style.
